

## A new system of the genus *Pediocactus* Britton & Rose.

Josef J. Halda

Sedloňov 125, CZ-517 82 Sedloňov, Česká republika

Halda, J.J.: A new system of the genus *Pediocactus* Britton & Rose. Acta Mus. Richnov. 5(1): 12-27 (1998). ISBN 80-86076-08-3.

*Pediocactus* Britton & Rose is revised; a genus is divided into 3 subgenera, 5 sections and 2 subsections. Many taxonomic changes are made and for each species a full synonymy is given.

Recent genera *Pediocactus*, *Sclerocactus*, *Gymnocactus* and *Turbinicarpus* create a complex of very similar morphologic characters, where especially flowers, fruits and seeds prove, that it is a variable complex of closely related species.

genus ***Pediocactus*** Britton & Rose, III. Flora of N U.S. and Canada.ed. 2:569 (1913). Type species: *P. simpsonii* (Engelm.) Britton & Rose.

[*Neolloydia* Britton & Rose in Bull.Torrey Bot.Club 49:251(Aug.1922), p.p.;  
*Turbinicarpus* F.Buxb. & Backeb. in Jahrb.Deutsch.Kakt.-Ges.1937(1):27(1937);  
*Gymnocactus* Backeb. in Blatt.Kakt.-Forsch. 1938:10,22(1938);  
*Rapicactus* F.Buxb. & Oehme in Jahrb.Deutsch.Kakt.-Ges. 1942(1):18-24(1942);  
*Normanbokea* Kladiwa & F.Buxb. in Krainz, Die Kakteen 40-41(1969);  
*Sclerocactus* Britton & Rose, Cactaceae 3:212 (1922);  
*Coloradoa* Boissevain in Boissevain & Davidson, Colorado Cacti 54 (1940);  
*Utahia* Britton & Rose, Cactaceae 3:215 (1922);  
*Pilocanthus* B. W. Benson & Backeberg, KuaS 8:187 (1957);  
*Navajoa* Croizat, Cact. Succ. J. Amer. 15:88 (1943);  
*Toumeya* Britton & Rose, Cactaceae 3:91 (1922);  
*Echinomastus* Britton & Rose, Cactaceae 3:147 (1922);  
*Ancistrocactus* Britton & Rose, Cactaceae 4:3-5 (1923);  
*Glandulicactus* Backeberg, Blatter Kakteenforschung 1938:6 (1938)].

## **subgenus *Pediocactus***

[*Pediocactus* Britton et Rose, Ill. Fl. of N. US and Canada.ed. 2:569 (1913); *Utahia* Britton et Rose, Cactaceae 3:215 (1922); *Pilocanthus* B. W. Benson et Backbg., KuaS 8:187 (1957)].

Caulibus adpressis; corpus simplex (rarius multiplex); spinae rigidae, tenues.

Stem flat or globular, rarely cylindric, single (rarely branched); spines rigid, thin.

Type species: *P. simpsonii* (Engelmann) Britton & Rose.

### **sect. *Pediocactus***

Spinae tantum erecti vel curvatae.

All spines erect or curved.

Type species: *P. simpsonii* (Engelmann) Britton & Rose.

*P. simpsonii* (Engelmann) Britton & Rose, Ill. Flora of N U.S. and Canada.ed 2., 569 (1913).  
subsp. *simpsonii*

var. *simpsonii*

[*Echinocactus simpsonii* Engelmann, Trans. Acad. St. Louis 2:197 (1863); *E. simpsonii* var. *minor* Engelmann, Trans. Acad. St. Louis 2:197 (1863); *Mammillaria simpsonii* M. E. Jones, Zoe 3:302 (1893); *Mammillaria purpusii* K. Schumann, Monatschr. Kakteenk. 4:165 (1894); *P. simpsonii* var. *minor* (Engelmann) Cockerell, Torreya 18:180 (1916); *P. simpsonii* var. *minor* (Engelmann) Boissevain & Davidson, Colorado Cacti p. 58 (1940), homonym; *P. hermannii* Marshall, Saguaroland Bull. 8:78 (1954); *P. simpsonii* var. *caespiticus* Backeb erg, Nat.
